

Printing and Creating Images from the Dashboards

The best way to create images for print and other uses is screen capture software. We used Snagit by TechSmith for our screen captures here. Following are the options provided by the dashboards.

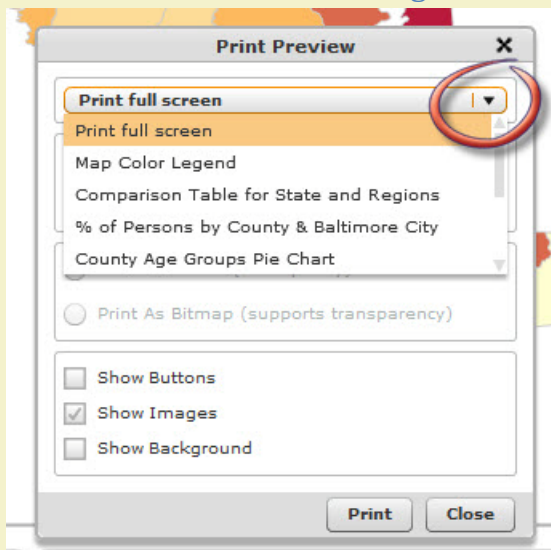

Right click anywhere on the dashboard to get the screen below:

Click on Print Preview;
The following screen will appear:

Click on the down arrow to get the drop down list:

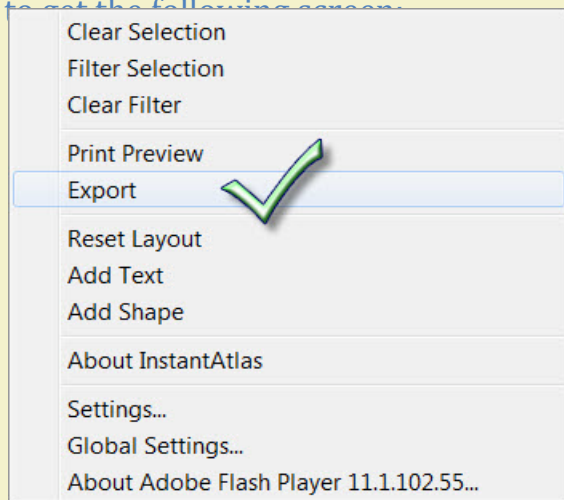

Choose a print option from the list

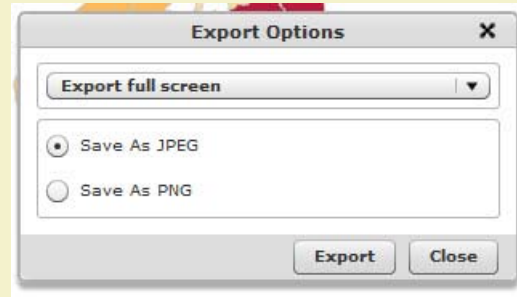

You may also export the dashboard or a portion of it as an image.

Instructions follow.

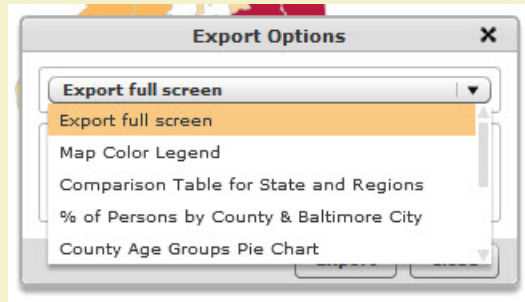

Right click anywhere on the dashboard to get the following screen:

Click on Export for the following screen:
Select JPEG or PNG

Select an option from the list and export to a location on your computer.

That concludes this section.
