

## Resizing, Zooming, and Moving Dashboard Components

By rolling your mouse over the upper right corner of a window in the dashboard you will see options for zooming and moving the window.

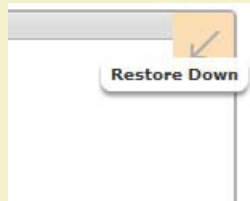

The area circled in the image above shows the controls. Click on the arrow to zoom the image. Click on the parallel lines to drag the image. The 'x' will close the image window.

The yellow highlighted section on the left will allow you to zoom the map only.

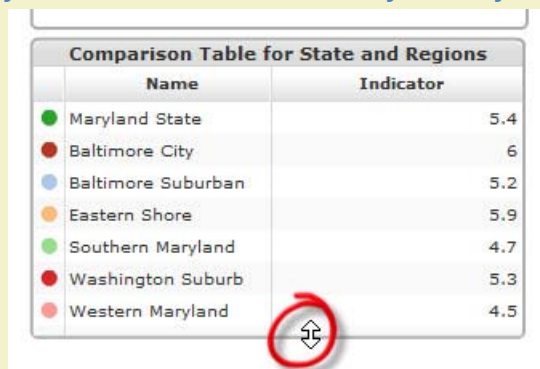

Right click on the image and left click Reset Layout to clear changes.

After an image is zoomed, roll the mouse over the upper right corner and click the down arrow to return the image to normal size.

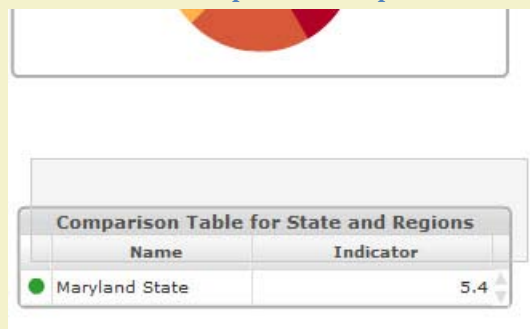

To resize a window in the dashboard, move your mouse over an outside edge. When you see the double arrow you may resize the window.

	Name	Indicator
●	Maryland State	5.4
●	Baltimore City	6
●	Baltimore Suburban	5.2
●	Eastern Shore	5.9
●	Southern Maryland	4.7
●	Washington Suburb	5.3
●	Western Maryland	4.5

This is an example of the previous window after it has been resized.

	Name	Indicator
●	Maryland State	5.4

**This concludes this section.**
