

Change Dashboard Colors or Legend Ranges

In the Map Color Legend window click on the crayon-looking icon at the upper left to open the Legend Settings window:

Legend Settings:

Border Color – this changes the color of the map county borders.

Transparency – in case of a background behind the map.

Palette – click a color to change the legend range colors.

Reverse Palette – reverses the order of the legend colors.

No. Classes – changes the number of numeric divisions in the legend and number of slices in the pie chart.

Classifiers – Quantile is the default. You may experiment for different ways of dividing the numeric ranges.
